SUMMARY

Software Engineer with 4 years of experience building and maintaining scalable, high-performance web applications using React.js, TypeScript, and modern JavaScript. Comfortable working across the full frontend stack, from component architecture and state management to RESTful API integration and role-based access control. Worked closely with product, design, and backend teams in Agile setups, and care about writing clean, maintainable code that holds up in production.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, Next.js

State Management: Redux Toolkit, Context API

UI Libraries: Material-UI, Ant Design, Bootstrap, Tailwind CSS

Data Visualization: Highcharts

DevOps & Tools: Git, GitHub, GitLab, Webpack, Babel, NPM, Yarn, Nx, CI/CD workflows

Testing & Debugging: React Testing Library, Chrome DevTools, Unit Testing

Security & Compliance: Role-Based Access Control (RBAC), OAuth2/OIDC concepts, Secure Coding Practices

Other: Firebase (Firestore, Push Notifications), WebSockets, RESTful APIs, Responsive Web Design, Agile, JIRA

PROFESSIONAL EXPERIENCE

Software Engineer

NextZen Minds Technologies Pvt Ltd. [Oct 2025 – Present]

- Built a multi-tenant eSchool platform that supports multiple schools running independently on the same system
- Built and maintained role-based access control (RBAC) to manage permissions cleanly across different user types
- Worked closely with product, design, and backend teams to scope and ship frontend features on time
- Kept code quality high through regular reviews, shared component patterns, and clear documentation
- Improved page load performance using lazy loading, code splitting, and optimized rendering approaches

Software Developer

CBNITS India Pvt. Ltd. [Dec 2022 – Sep 2025]

- Worked on several client-facing frontend projects in Agile teams, with a focus on performance, clean code, and long-term maintainability
- Turned business and client requirements into responsive, well-structured web interfaces using React.js and TypeScript
- Took ownership of frontend architecture discussions and helped set team standards around Git workflows and code reviews
- Built shared component libraries that cut down repeated work and kept the UI consistent across projects
- Improved load times across projects through modular design, lazy loading, and reducing bundle sizes

PROJECTS

Brainstake ([admin.eschools.tech](#))

- Built role-based dashboards for Teachers, Parents, Students, Admin, Super Admin, and Accounting using React.js, TypeScript, Redux Toolkit, and Ant Design
- Set up a full RBAC system covering Admin, Super Admin, and Accounting roles so access is controlled at the route and feature level
- Handled complex form flows and dynamic data rendering across multiple user roles with clean state management
- Integrated RESTful APIs across all modules and handled edge cases like loading states, error boundaries, and empty states properly

- Improved performance noticeably through component optimization, better state management, and lazy loading
- Structured the frontend in a way that makes it easy to add new features without breaking existing ones
- Worked closely with the backend team to align on API contracts and reduce integration issues during releases

ConnectBud (connectbud.com)

- Migrated the codebase to TypeScript with proper typing and reusable models, which made the code a lot easier to work with
- Built custom Material-UI components and added guided onboarding tours using React Joyride
- Added real-time chat using WebSockets, which made the platform feel much more responsive
- Built the Admin Panel to handle tutor verification, assignments, and payment and membership tracking
- Wired up Firebase Push Notifications and Cloud Firestore for live updates and remote config
- Improved overall app performance by restructuring with Nx monorepo, lazy loading, and breaking the app into smaller focused modules

CloudArmour

- Worked with UI/UX and backend teams to build responsive, polished interfaces using Material-UI
- Built data-rich security dashboards using Highcharts and Redux Toolkit
- Made the codebase easier to maintain by extracting shared UI into reusable components
- Added role-based route protection to keep admin sections secure

EDUCATION

Bachelor of Technology (B.Tech), Electrical Engineering

JIS University | Narula Institute of Technology

CGPA: 8.4 / 10 | Graduated: July 2022
